

# Reinventing learning in the digital age

Econocom  
assists schools in integrating  
digital tools and methods so that  
new technology can become child's play  
for everyone.

econocom

# Integrating digital technologies in schools in 5 steps with Econocom

## 01 Audit and analyse needs and expectations

in terms of teaching, technology and budget

## 02 Working with the teaching staff

- Presentation of teaching applications by an instructor
- Project team set up
- Teaching needs and content defined for each level and subject

## 03 Project and services defined for you by Econocom

- Equipment and technology solution recommendations made
- Security and control tools chosen (parental control, data security, remote administration and locking, etc.)
- Technical audit and compliance (Wi-Fi, network, servers)
- Assistance in implementing digital uses when teaching
- Service levels (installation, after sales, technical support)
- Budget approved

## 04 Equipment and roll-out

- Implementation schedule
- On-site distribution, installation and deployment
- Training and assistance for teaching staff around digital uses in pedagogical practices

## 05

### Operational phase and progress plan

- Steering committees
- Technology monitoring (digital equipment and content)
- Support and upgrade assistance (financing, scope of assets, software licences, etc.)
- Equipment recycled

CONNECTING KNOWLEDGE!

# Our 5 areas of expertise ensure a successful deployment

Whether you're Head of a primary or secondary school or higher education institution, technical manager, teacher or local government member, Econocom offers a range of tailored, end-to-end "Smart Solutions for Education" to guarantee a successful digital deployment.

## METHODOLOGY

Assistance and project management to offer a tailored solution

### TEACHING

- Education project management WITH the teaching staff
- Advice on content (textbooks and applications) for each level and subject
- Assistance and training from teachers on using the tools

### TECHNOLOGY

- Audit of the infrastructure
- Set up a Wi-Fi network
- Connectivity
- Digital hardware supplied ready to use (tablet, PC, VPI, etc.)
- Preparation, distribution and deployment assistance
- Training for the hardware

### OPERATION

- Maintenance and technology refresh
- Insurance
- Security (MDM)
- Telephone support
- Hosting
- Infrastructure training (for the technical teams)

**FINANCING** Investment budget OR operational budget for a fixed monthly fee

A number of clients including local education authorities, universities, business schools, private schools and training organisations along with a variety of partners - technological, content editors and teacher trainers - to cover all your needs on all platforms.
